

BTIWE Tissue-Control WE

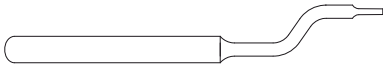

Tissue-Control WE este o adiție utilă la sistemele MEISINGER pentru oase. Substituenții sub formă de lama facilitează stabilizarea lamelor osoase întinse și, în plus, oferă un ajutor considerabil utilizatorului.

Tissue-Control WE is a useful addition to the MEISINGER bone spreading systems in complex augmentations. The wedge-shaped placeholders facilitate the stabilization of the stretched bony lamellae and, in addition, offer considerable assistance to the piezo user.
