

BT100 Tissue-Control

Tissue-Control oferă aplicații a tehnicilor moderne în lucrul cu țesutul dur și țesutul moale. Design-ul instrumentelor portabile este deosebit de bine adaptat pentru tehnicile tunel sau plic, precum și pentru lărgirea osoasă folosind o greă de extensie modificată.

Tissue-Control offers applications for modern techniques in hard and soft tissue management. The design of the hand-held instruments is outstandingly well suited for the tunnel or envelope techniques, as well as for bone spreading using a modified extension graft.
